- Save back injuries
- Stop roll damage
- New roll handling device

L-Roll Pivot Arm Assembly

The L-Roll Pivot Arm assembly with center lift is the **safest, most effective, cost efficient** and **durable** way to lift, move, position and place rolls on the market today. The flexible 2-point suspension system allows for easy alignment with roll core I.D.'s from 3" to 20". An important safety design incorporated in the Center Lift; it is impossible to disengage while supporting up to 1,000 lbs., yet the handle lifts easily when release is desired. The L-Roll Pivot Arm assembly enables true horizontal and vertical roll positioning, 360° North to South effortless roll rotation – to get your rolls where you want them. The L-Roll Pivot Arm grabs rolls by the core I.D. preventing material damage and designs are available to turn the roll in any direction.
